OSU Libraries

Metadata Librarian

Works closely with faculty and academic units outside of the library to describe and organize the research data and other information they produce. Assists faculty in writing metadata portions of National Science Foundation data management plans.

Data Management Specialist

Plays a central role in developing services and data management plans to support the data generated by the OSU research enterprise. The position collaborates with faculty, graduate students, academic units and research center personnel to identify, manage, describe, preserve and make research data available and accessible to appropriate audiences.

Graduate Student Project

Data Management Workshop

Collecting data for your thesis or dissertation? Learn to manage your data effectively and efficiently with Introduction to Research Data Management Planning. This seminar will provide an introduction to capturing, storing, and describing research data throughout the life of the research project and after. This is intended for those researchers who need help with a data management plan or for those who are just beginning a data management plan. The discussion will cover, granting agencies' requirements, how to fulfill them and how it is to the researcher's advantage to do so.

Conclusions

- Researchers love to talk about their data
- Every data management situation unique
- Graduate students aware but not savvy
- Need for early education

What OSU Will Do from Here

- Continue Workshops
- More Basic Workshops
 - Workshops on metadata
 - Workshops on setting up a lab notebook
 - Workshops on setting up collaborative workspace
- Advanced Workshops
- One-on-One Consultations
- Put a link to the Data Management Services Page on the OSU Libraries Home Page
- List of Data Projects and Portals
 - <http://libraries.mit.edu/guides/subjects/data-management/publishing.html>
