

A Collaborative for Batch Processing

Philip Young
Catalog Librarian
Virginia Tech

Why are we all making the same edits to the same batches?

Why can't a batch be corrected once, and then put on the network level for all to benefit from?

ibiblio.org/batch/load

The screenshot shows the main page of the Batch Load Collaborative Wiki. At the top right, there is a user profile for 'Pyoung' with links for 'my talk', 'my preferences', and 'my wa'. Below this is a navigation bar with buttons for 'page', 'discussion', 'edit', 'history', 'delete', 'move', 'protect', 'watch', and 'refresh'. The main heading is 'Main Page'. On the left side, there is a sidebar with the following sections: 'BATCH LOAD COLLABORATIVE WIKI', 'navigation' (Home page, Recent changes, Help, Add content), 'browse wiki' (Content collections, Record sets, Record set reviews, Uploaded files), 'search' (a search box with 'Go' and 'Search' buttons), and 'toolbox' (What links here, Related changes, Upload file, Special pages, Printable version, Permanent link, Browse properties). The main content area is titled 'Batch load collaborative' and contains a list of links: 'About the Batch load collaborative project', 'How to add content to the wiki', 'Batch listserv', and 'List of all files uploaded'. Below this is the 'Browse content' section, which lists several content collections: '[-] Content collections' (Books 24x7, Books 24x7 Business Pro, CRC netbase, ECCO, ECCO II, EEBO, Knovel, SPIE Digital Library, Springer e-books), 'Add a new content collection', and '[-] Record sets' (Books 24x7--Books 24x7--BPro, CRC netbase--Taylor and Frances--NetBase Sets/Series, ECCO II--Gale--Initial, ECCO--Gale--Original, ECCO--Gale--Updated, EEBO--ProQuest--EETS1). At the bottom left, the word 'Done' is visible.

Strategies

- Work with vendors
- Batch upload to a utility
- Z39.50
- File sharing

...and Issues

- OCLC record use policy
- Authority control
