EXPANDING TECHNICIANS' WORK WITHIN AND BEYOND THE ILS: "WHOEVER HAS THE ITEM/ INFORMATION COMPLETES THE WORK"

Technical Services Workflow Efficiency Interest Group
February 2, 2015
Betty Landesman

University of Baltimore
# Technical Services and Content Management Dept.
July 2012

2 library faculty:
   Myself (Dept. Head)
   Electronic Resources Librarian

2 library technicians:
   "Acquisitions Technician" (Library Tech II)
   "Cataloging Technician" (Library Tech II)
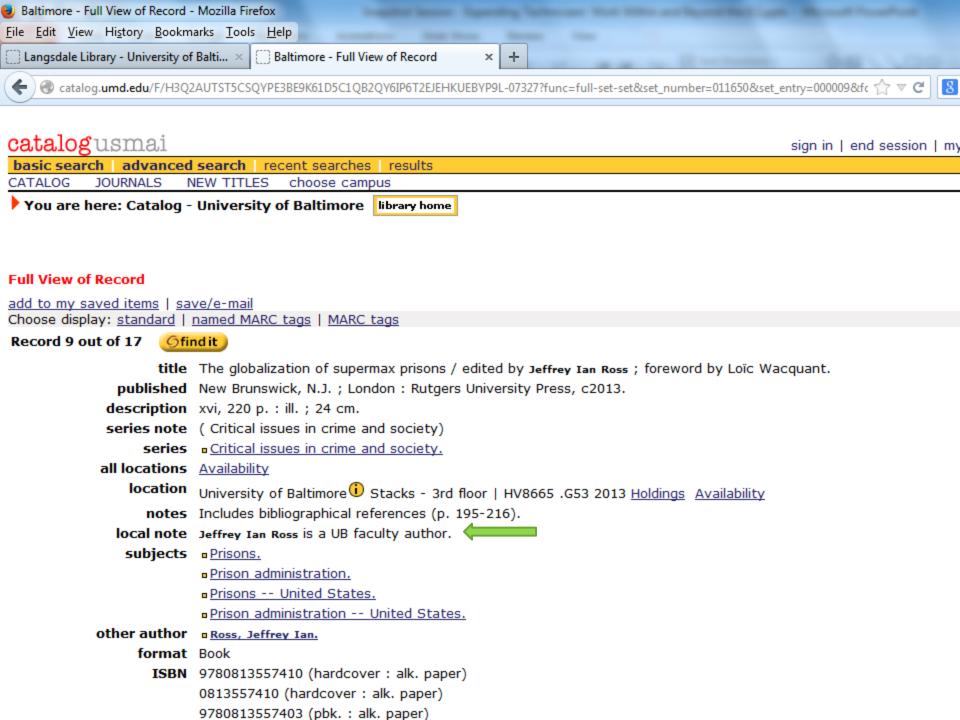

Early Changes – Within ILS

❖ Receipt of standing orders
  ❖ The technician who checked in the volumes now also completed the item record creation and physical processing (barcode, security, label, etc.) instead of passing it on to the other technician
  ❖ This necessitated the purchase of a second spine label printer – but it was worth it!

❖ Tracking value of gifts added to the collection
  ❖ The technician who did the copy cataloging created an order record in the Acquisitions module (using a Gift fund) and entered the amount found in Amazon

Next – Augmenting the ILS

❖ Consortium implementation of "vintage" Aleph system

    ❖ Shared bibliographic record

    ❖ Local data in "special" fields so would only display in "your" catalog

   ❖ And only in the Aleph catalog (not very visible in WorldCat Local record)

    ❖ Started a program to add a note that someone was a UB faculty author – great idea but hard to see in catalog:

WorldCat Lists

❖ Learned about this feature from Reference staff, who had started lists for DVDs and Leisure Reading

❖ Created new lists for Faculty Authors and Alumni Authors, took on responsibility for updating all WorldCat lists as just one more step in cataloging new materials – while we have the item in our hand

eBook Processing

❖ We purchase individual titles only
   ❖ Technicians created acquisitions records and catalog in Aleph, same as for print
   ❖ Electronic Resources Librarian activated in SFX
   ❖ (and all of the above were not always synchronous)

❖ Now:
   ❖ Order though jobber
   ❖ When notified that title is live, technician who does the copy cataloging receives the title in Aleph, completes bib/item work, AND activates the title in SFX
      ➢ Complete Aleph work => copy OCLC record #, paste into Connexion to bring up record, update holdings **=> copy ISBN, paste into SFX object search, activate appropriate portfolio**

A-Z List (Serials Solutions)

❖ Includes individual journal subscriptions, both print and electronic

❖ The Electronic Resources Librarian was the only person who updated Serials Solutions

❖ Catalog and A-Z often out of sync as we added/ cancelled subscriptions and did major journal withdrawal projects – different staff members updating different systems

First Step:

❖ HUGE print journal withdrawal project

   ❖ Technician deleted from catalog and OCLC
   ❖ Technician then learned to delete from A-Z list – same idea, just different keystrokes

Next Steps:

❖ Major Aleph work needed to update journal records representing transition from print, subscription changes, etc.
❖ Trained technician who checked in (what's left of) our print journals in Aleph to update SFX and A-Z list

And Then Came The Tsunami Of Change …

❖ Both technicians left and we hired new technicians
❖ The new acquisitions technician left after 9 months
❖ The new cataloging technician took on most of his responsibilities to keep things going – and thrived
❖ We rewrote the acquisitions technician's position to be half-time and include some responsibilities outside of TS
❖ We had the opportunity to review the position classifications and the full-time staff member was reclassified to Library Services Specialist
❖ Having achieved salary savings by changing a position to half-time, we are trying to get approval to hire another librarian to handle the hard cataloging

"Whoever Has the Item/ Information Completes the Work"

RECORDS ARE RECORDS
UPDATING IS UPDATING
THE SOFTWARE DOESN'T MATTER!
