Online cataloging

- Simple and complex cataloging supported
 - Image record
 - Complex authority records (Works, Names, and geographic terms)
- Ability to add custom fields and controlled lists
- Cataloging efficiencies
 - Customizable cataloging templates
 - Bulk editing
 - Copy/paste functionality on record and field levels
 - Duplicating records
 - Community-built shared authorities fully integrated

Title

Shared vocabularies

- Builds on more than ten years of authority work championed by the Getty Research Institute
 - ULAN™
 - TGN™
 - CONA™ (in development)
- Enables Shared Shelf community to draw upon shared terms and submit new “candidate” terms
 - “Candidate” terms may be made available to all Shared Shelf users in real-time
- Integrates community-built and local authorities directly in the Shared Shelf interface
- Facilitates faster, more consistent cataloging by drawing on an aggregated pool of shared authorities

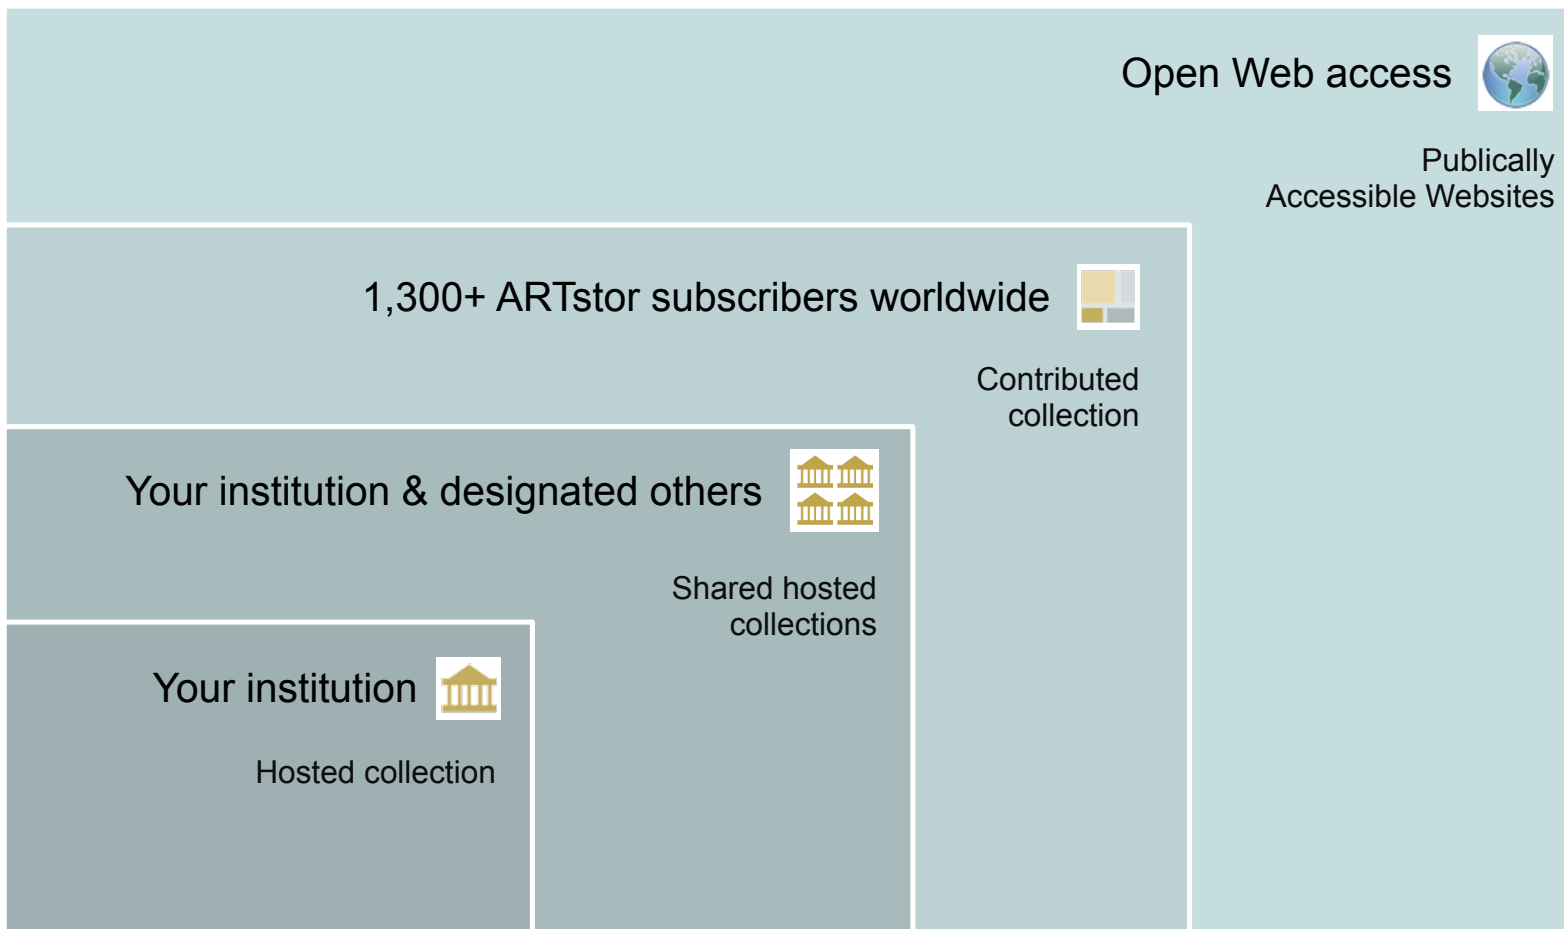

Digital asset management

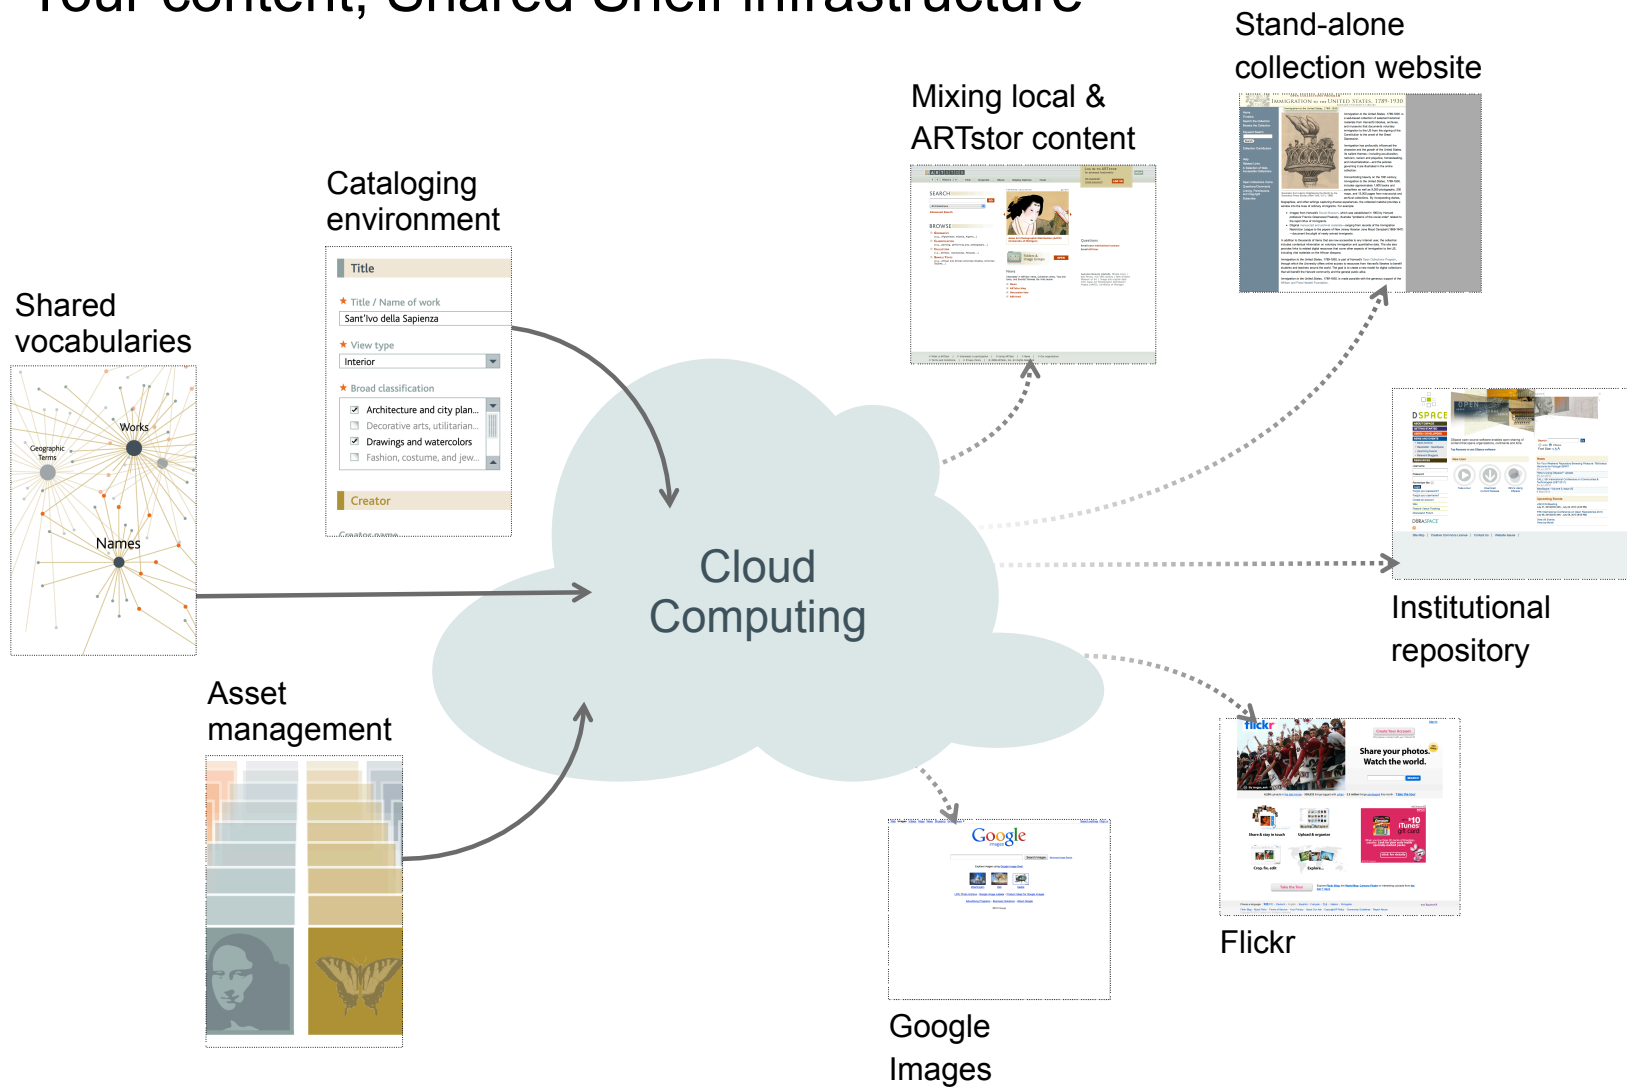

- Support for multi-media resources:
 - Still images
 - Future: panoramas (qtvr), audio (mp3), video files
- Ability to upload and remotely store source files (cloud-based storage)
 - Persistence of source files
 - Upload over the Internet or possible use of a client-based uploading application

Options for publishing content

Your content, Shared Shelf infrastructure

Non-art collections

- Multiple data schemas map easily with Shared Shelf display record
- New metadata models can be created in Shared Shelf:
 - DARWIN Core (Biodiversity informatics data standard about organisms)
 - AVM (Astronomy Visualization Metadata Standard)
- Use case scenarios and test cases being gathered from Shared Shelf partners
