

# Developing practical metadata services for data management programs

*kevin m. clair*

*american library association annual conference*

*anaheim, california*

*25 june 2012*

# introduction to data management

- data management services in libraries
- public service components
- technical and infrastructural service components
- staff training needs

# data services in libraries

- [Purdue University](#)
- [Cornell University](#)
- [University of Houston](#)

# public service components

- outreach
- instruction
- partnerships with early adopters

# **technical service components**

- **repository development**
- **awareness of disciplinary repositories**
- **metadata standards (ours and theirs)**
- **authority control**
- **advocating for metadata services**

# staff training needs

- **systems**
- **managing expectations for data and related content**
- **connections with RDA and linked data standards**

## future steps

- repository launch
- further outreach to users
- usability, usability, usability
- training of staff

**thanks for listening!**
