What did you think of the book? Give specific examples, if possible.

I enjoyed it, but I also don't think I can give a full opinion. As is, it looks very interesting and could go in good directions as a series. But as a individual book... I am dissatisfied. Plot jumps everywhere but goes no where. Humors OK...

Do the artwork and text work well together? Examples, please.

The art for the most part is well done! There are odd moments where I have no clue... but overall its well done with a good flow.

The book shows a great promise... but in the end, thats all this book is. The series as a whole may be outstanding! But this individual book does little to get my attention... and whats a good looking plot if you never get through book 1.
