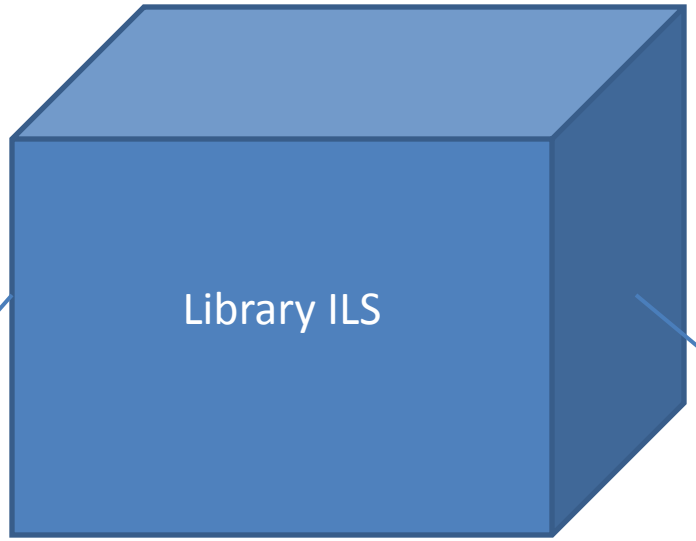
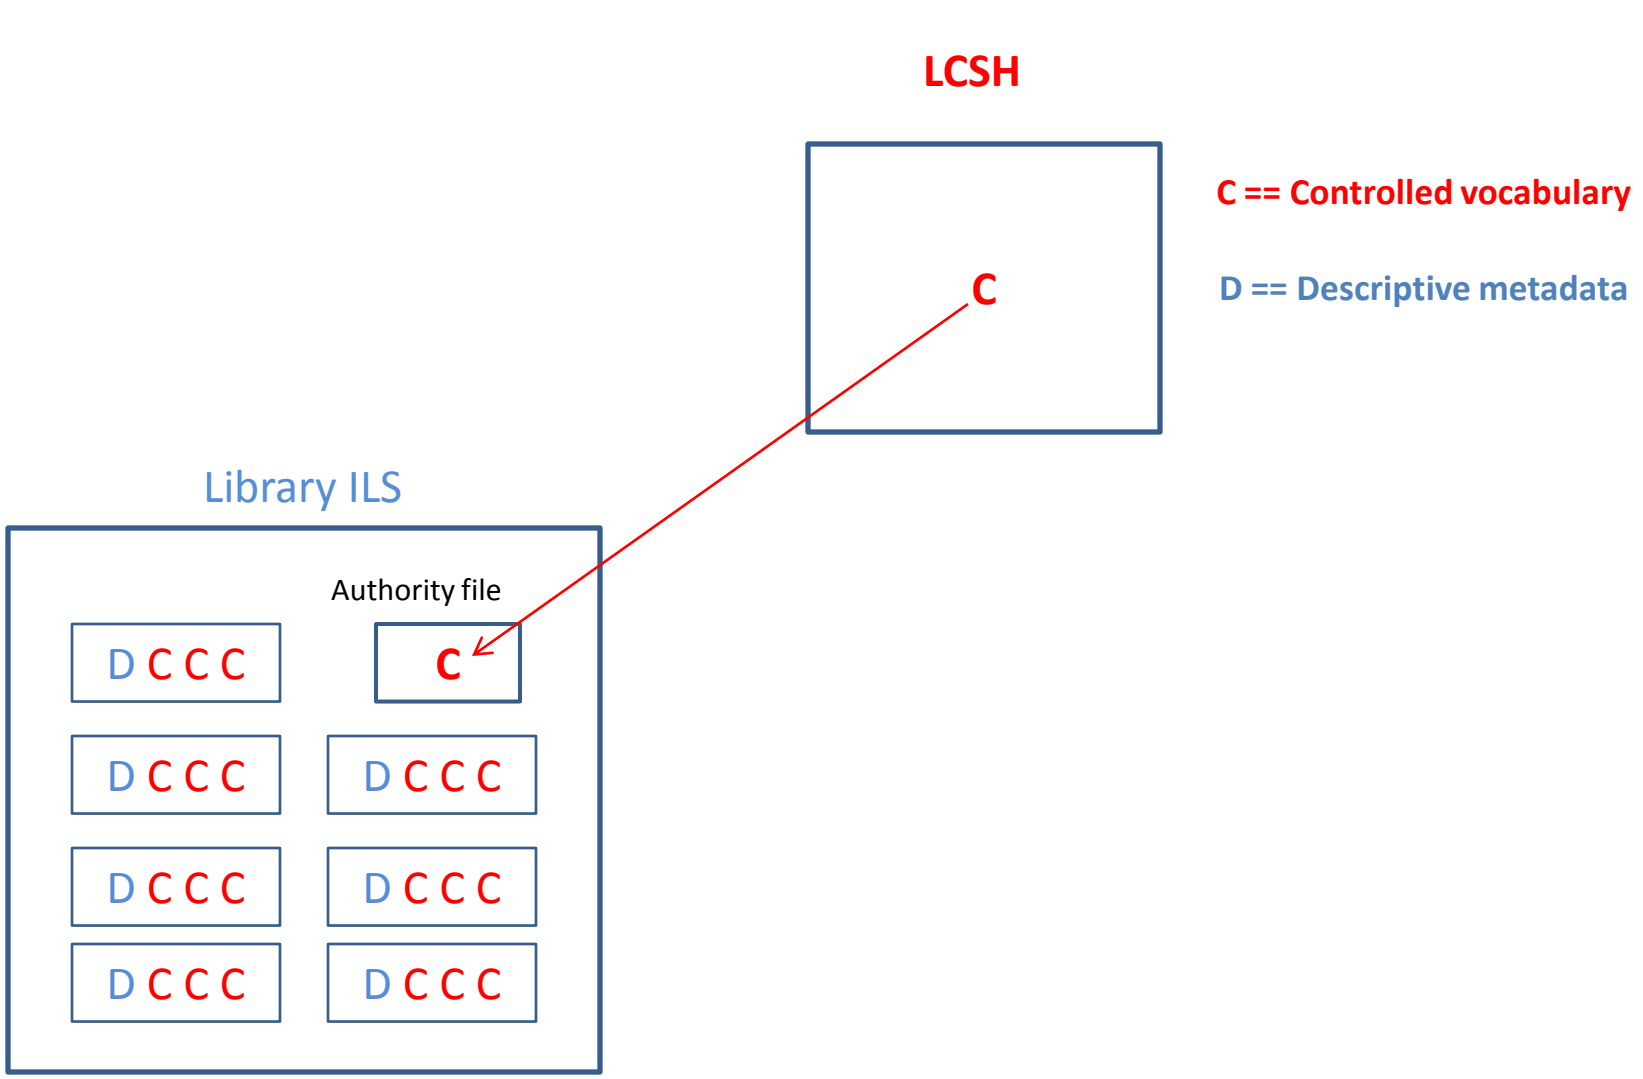
MARC records repurposed for use in the digital repository or harvesting



MARC -> OAI-PMH

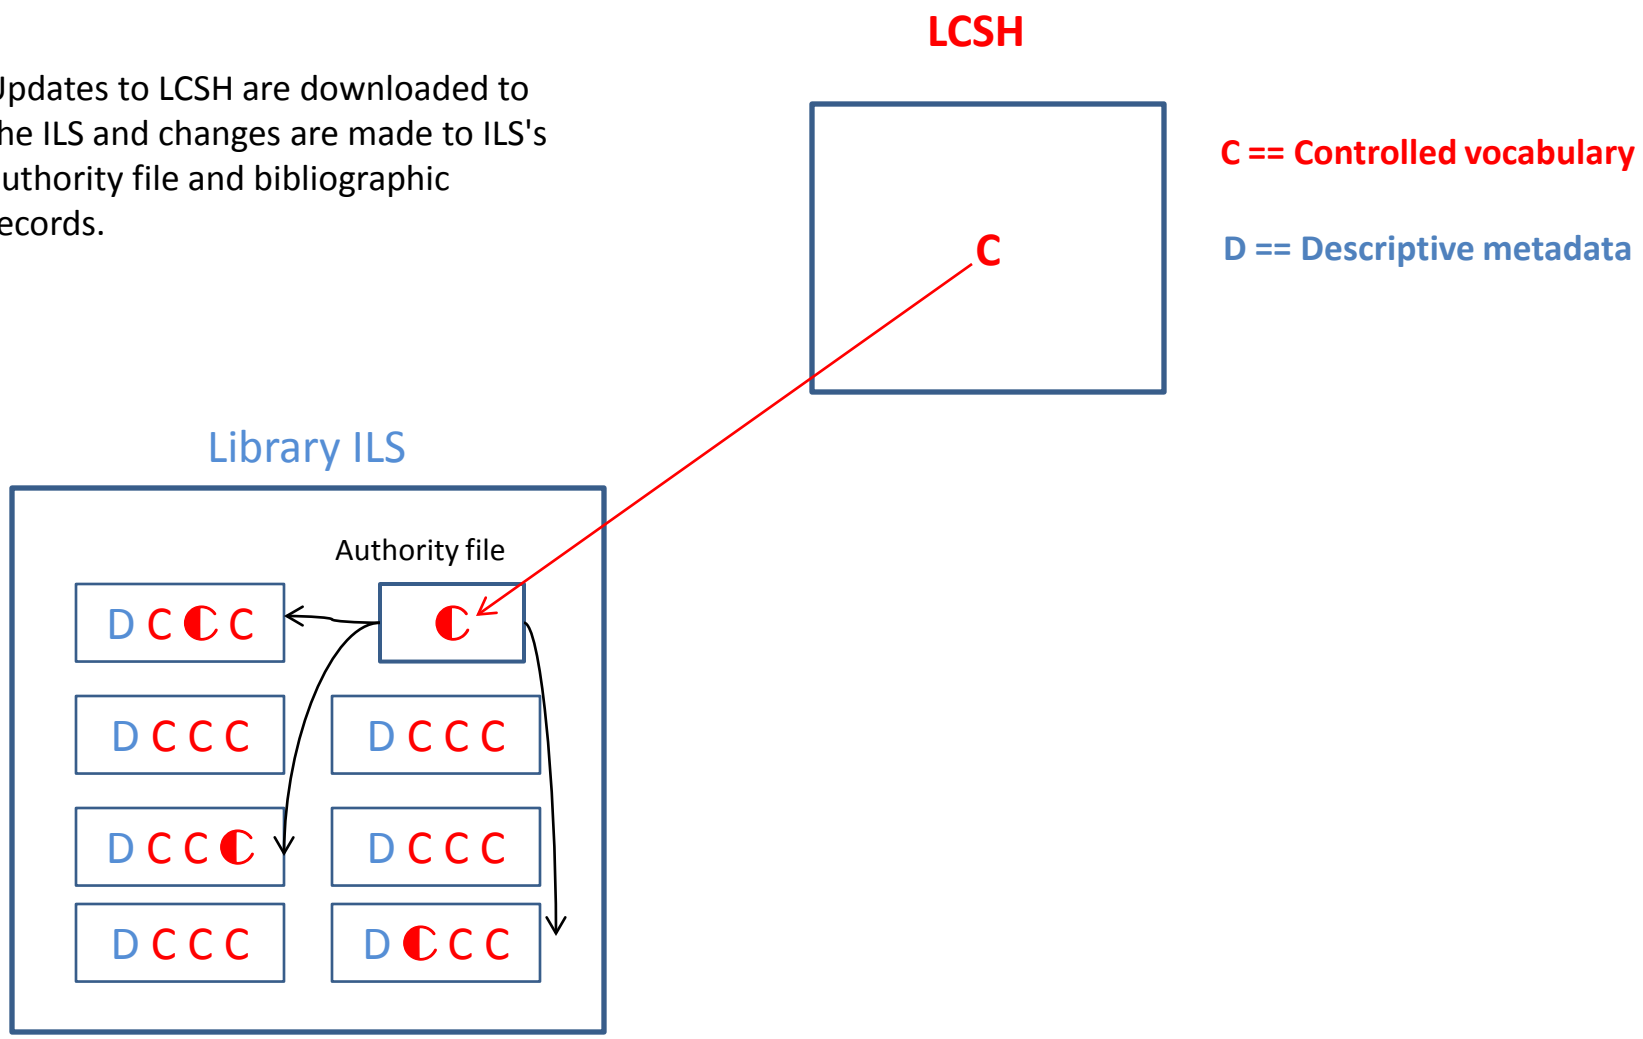
Metadata harvester

MARC -> MARCXML,
MODS, Dublin Core, etc.

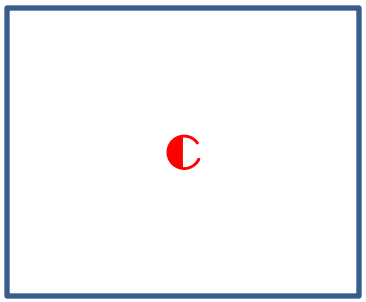


LCSH
C == Controlled vocabulary
D == Descriptive metadata
C
Library ILS
Authority file
D C C C
C
D C C C
D C C C
D C C C
D C C C
D C C C
D C C C

Updates to LCSH are downloaded to the ILS and changes are made to ILS's authority file and bibliographic records.

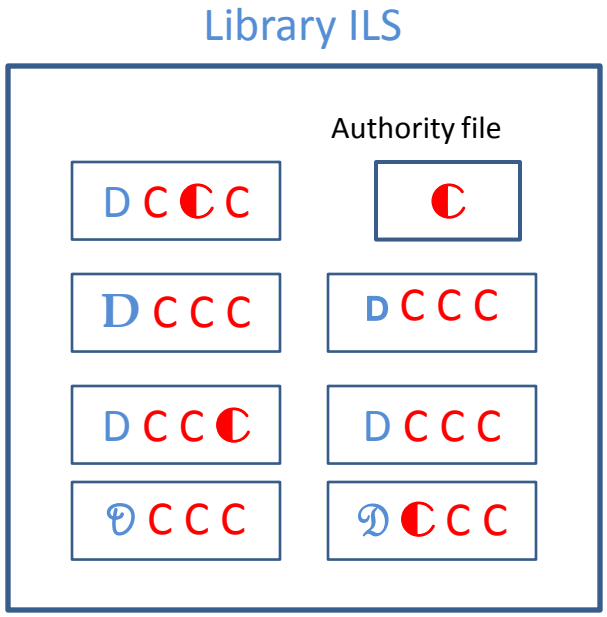


Updates to descriptive fields are made. Maybe a typo is corrected, a note is added, or a table of contents.



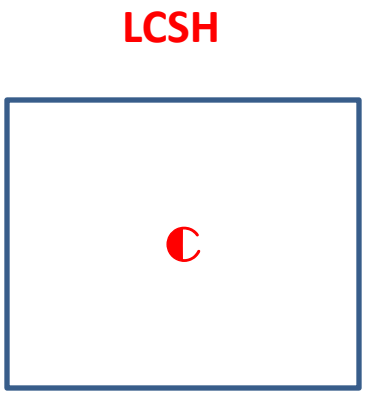
C == Controlled vocabulary

D == Descriptive metadata



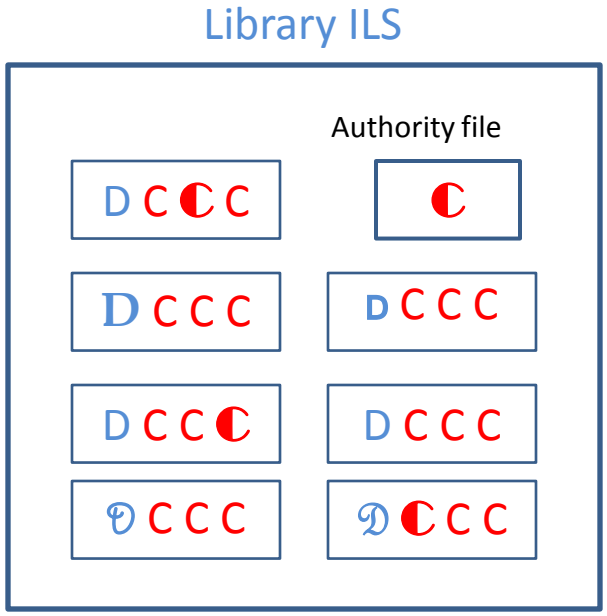
Eventually both the descriptive metadata and controlled vocabularies will look very different from their original.

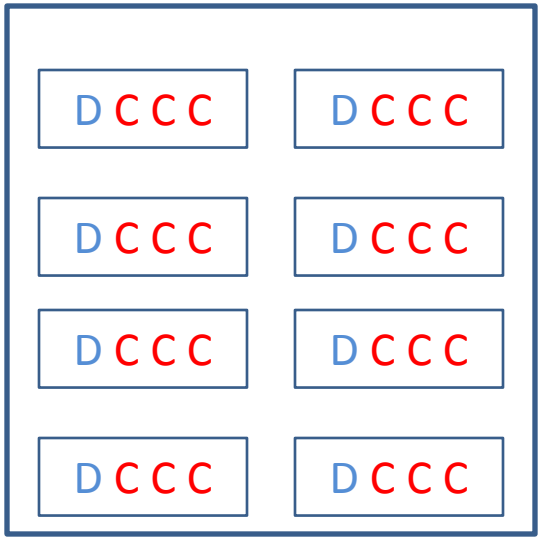
If the original record was exported as MARCXML and ingested into the digital repository, it remains unchanged there.



C == Controlled vocabulary

D == Descriptive metadata





Example 1: Record originates in Voyager
