The Strategy of the ISSN IC

- Key objectives:
 - Release part of ISSN data under 
 - Provide ISSN data to users in various formats including linked data formats,
 - Implement a new ISSN portal including a customer relationship management system,
 - Design specialised services based on ISSN data,
 - Charge fee for ISSN assigned by the ISSN International Centre to publishers based in countries without ISSN Centre,
 - Provide upgraded services to users.

Implementing the strategy

- Consultancy mission about agile methodology to specify user stories and delineate the portal's functionalities,
- Call for tender in September 2016 and contractor selected in November 2016,
- Distant or in-person sprint reviews held every three weeks,
- One product owner for the portal, one for the CRM,
- First release of the new system in January 2018, final release in July 2018.

Claiming a resource

Are you responsible for a resource to which an ISSN has already been assigned?

You may claim responsibility over that resource by using the "claim" function.

By claiming a resource, you may:

- freely access and download the full bibliographic description of the resource;
- generate an ISSN certificate;
- check the accuracy and timeliness of the bibliographic description;
- request modification of the record.

In order to claim a resource, you first need to search its record in the Portal, by using the search function above. Second, when you access the record of your publication, use the "claim resource" function (in the "tools" menu on the right) to fill in the claim request form and to provide the ISSN International Centre with related documentary evidence.

An ISSN librarian will check your request and process it in the soonest. Please provide complete and exact information in the web form in order to improve the request processing time.

You may also declare a "transfer of ownership" on any resource you become responsible for. It is similar to a "standard" claiming requests, with two exceptions:

- you may indicate the name and contact of the transferring publisher;
- you may indicate a date for the transfer of ownership if it is not immediate.

For more information, please refer to the [ISSN Extranet FAQ](#).

TRANSFER

[HOME](#)

[SEARCH](#)

[BROWSE](#)

[STATISTICS](#)

[API](#)

[SUCCESSIVE TRANSFERS](#)

Welcome to the Transfer Alerting Service

The [NISO Transfer Code of Practice](#) sets out best practices for scholarly publishers to ensure that journal transfers between parties occur with minimum disruption and that the content remains accessible. The Transfer Alerting Service (TAS) has been designed to facilitate communication of journal transfers and is hosted by the International ISSN Centre.

The TAS is made up of:

- A database of journal transfers which can be [searched](#) or [browsed](#). This allows librarians and other interested parties to access the details of journal transfers announced through the TAS and provides an archive of transfer information supplied by publishers using the service.
- A notification service available through an [RSS feed](#) or by signing-up to an email list. Librarians, information professionals, and representatives of other organisations with an interest in journal transfers are encouraged to sign up to the list. Every time a journal transfer is announced through the TAS, registrants receive email alerts detailing the journal(s) involved, bibliographic information, and contact details for the publishers involved.
- An [API](#) which may be used by interested parties to query or integrate with the TAS.

Publishers are required to register with the International ISSN Centre to provide journal transfer information for announcement through the TAS. Under the terms of the Code, endorsing publishers are required to use the service whenever they receive a new journal.

What's next?

- System based on open-source software, notably Drupal,
- Code provided by the contractor as part of the agreement,
- Current ISSN portal decommissioned later this year,
- ISSN National Centres can use the CRM for their own purposes,
- Release 2018 final version before summer,
- Get feedback from users and upgrade when necessary.
